Re: RM-11592

Dear Ms. Dortch:

On November 10, 2010, the undersigned met with Louis Peraertz, Legal Advisor to Commissioner Clyburn, to discuss the lack of interoperability in the 700 MHz spectrum. The undersigned reiterated several points made in previous filings in this proceeding regarding the urgent need for the FCC to resolve interoperability concerns in the 700 MHz bands.

The continued lack of interoperability across the 700 MHz bands is delaying the economic benefits that would accompany deployment of 4G technology from reaching substantial areas of the country, including America's many non-urban communities.

For example, Cellular South has for months been prepared to immediately put available capital to work to deploy its 700 MHz network in compliance with the FCC's build-out requirements and for the benefit of its rural and regional consumers. Without, however, the certainty of interoperability across the 700 MHz spectrum, many carriers' capital will remain sidelined – unable to create jobs or increase economic activity within its 700 MHz license area.

Cellular South files this *ex parte* notification electronically with your office.

Sincerely,

/s/ Benjamin M. Moncrief

Benjamin M. Moncrief
Manager, Public Policy
